

PILOT PLANT CONTRACT MANUFACTURING

Pilot Plant Contract Manufacturing

- ⦿ Food Research Lab's Pilot Plant Contract Manufacturing Unit is a prior-to-commercial production system that uses new production technology and produces small batches of food, beverage and nutraceutical-based products, mainly to learn about the latest technology.
- ⦿ The knowledge obtained is then used to design full-scale food production systems and commercial developments, identify further research objectives and support investment decisions.
- ⦿ Other non-technical purposes are gaining public support for new food products and checking if government regulations are followed.
- ⦿ Pilot Plant Contract Manufacturing food processing offers the advantage of experimenting and optimizing the food production process that large scale manufacturing sites do not tend to have.

Food Research Lab Pilot Plant Contract Manufacturing helps you to

- ⦿ Examine the lab process before investing in the production unit.
- ⦿ Evaluate and validate process and equipment
- ⦿ Pre implement guidelines for production and process controls
- ⦿ Evaluate changes in the process during scale-up operation and avoid the scale-up problems

- ✔ Find and examine all the by-products
- ✔ Produce a trial lot of quantities of material
- ✔ Conduct clinical studies, process development, analytical development and stability testing.
- ✔ Provide manufacturing directions for large scale production.

Food Research Lab uses the food Pilot Plant contract Manufacturing Unit to provide our clients with contract manufacturing services. You can lay down your product specifications, and we utilize our pilot manufacturing unit and manufacture your products in the required quantity and quality.

Food Pilot Plant Contract Manufacturing Unit consulting and development is also another aspect in which Food Research Lab can provide its expertise.

Our clients can utilize the facilities in the pilot plant and allocate projects to our food formulation scientists, who formulate and develop new innovative food, beverage and nutraceutical products and test them before launching in the market.

We have a vast network of farmers, food suppliers, wholesale food distributors and food company owners to link up with and manufacture your products on a contract basis.

We save you countless resources and time so that you can focus on scaling up your business while we get the job of manufacturing your products done.

About Us

Food Research Lab R&D, food innovation company, is the unit of Guires. With years of experience in research especially in medical device and pharmaceutical regulations, food product development, scientific publications and clinical trials, the company has now ventured into food research and formed a separate unit, under the brand name of 'Food Research Lab' that will drive food forward. Food Research Lab brings together the latest in food processing equipment, expert food scientists, chefs, nutritionists and partners from across the globe to help food companies and entrepreneurs get their products to market quickly and effectively.

Food Research Lab makes your dream concept into a commercial product as we have strong knowledge of ingredients, processing techniques, and we can bring them all together to help you make the right decisions.
