

Functional Food & Nutraceutical Product Development

New vegetarian Product Development

- ✔ Food Research Lab can be your Functional/Nutraceutical food products development and scale-up partner, starting from the primary feasibility testing of your initial concept to the finished product in your hands.
- ✔ We combine a unique range of health components and functional incorporating technologies with well-equipped formulation laboratories managed by technical teams with excellent scientific knowledge.
- ✔ We apply reverse pharmacology for developing functional foods/herbal supplements and nutraceutical food products for health.
- ✔ Functional and nutraceutical lipids: Omega-3 fatty acids, MUFA, MCF acids and triacylglycerol's, CLA, Diacylglycerol oils, structural lipids
- ✔ Functional plant ingredients: Soy extracts, plant sterols and stanols, beta-glucan and inulin
- ✔ Dairy ingredients: functional dairy products, galactooligosaccharides, lactulose
- ✔ Probiotics, prebiotics, synbiotics and antioxidants products
- ✔ Microalgae based functional lipids
- ✔ Functional foods for the brain that boost the immune system, phytosterols, neurodegenerative, omega 3, 6 and 9 fatty acids

At Food Research Lab, we give significance to the following aspects to develop a successful functional food product or a nutraceutical product;

- ✔ The purity and sustainability of components.
- ✔ Scientific evidence of effectiveness.
- ✔ Guarantee of product quality.
- ✔ The comfort and convenience of the formulation.

Global regulatory authorities are rigorously scrutinizing the quality, safety, and efficacy of nutraceutical components and final products. Consumers are becoming more health-conscious in buying nutraceutical and functional food products, and more people are turning to herbal supplements for their health. Top nutraceutical companies in India and across the globe are coming up with innovative health supplements and dietary supplements, and the market keeps growing at a good pace.

The Food Research lab uses its years of research & Nutraceutical product development, positioning itself as a reliable worldwide nutraceutical and functional food product development partner, assisting customers in reducing project risk and accelerating time to market.

About Us

Food Research Lab R&D, food innovation company, is the unit of Guires. With years of experience in research especially in medical device and pharmaceutical regulations, food product development, scientific publications and clinical trials, the company has now ventured into food research and formed a separate unit, under the brand name of 'Food Research Lab' that will drive food forward. Food Research Lab brings together the latest in food processing equipment, expert food scientists, chefs, nutritionists and partners from across the globe to help food companies and entrepreneurs get their products to market quickly and effectively.

Food Research Lab makes your dream concept into a commercial product as we have strong knowledge of ingredients, processing techniques, and we can bring them all together to help you make the right decisions.
